P7 Portable Multimedia Player

Controlling the 4.3" wide LCD of P7 touching the screen with your fingertips

P7 has a 4.3" wide screen, and you can use the Flicking Effect to control things with your fingertips when you use its multimedia functions for video and photos.

Magazine-look GUI that you can control intuitively

P7 has a GUI layout that looks like a magazine, which lets you look at all the main features on the main screen at a glance. The thumbnails on the screen, instead of conventional icons or texts, allow you to quickly access what you want.

Premium iriver design using aluminum

P7 has a minimalistic shape and an aluminum body, which gives it a modern and classy feeling. Besides its usual functions, Package is reusable as an accessory container, a business card holder, a pen holder, a picture frame, etc.

Ever more powerful multimedia features

As a true multimedia player, P7 is compatible with various video codecs, and it has many other multimedia features such as music which lets you play back recordings for 35 hours continuously, and other features for FM radio, photo viewer, text viewer, and voice recording.

A built-in micro SD slot for expansion

P7 has a built-in micro SD slot to let you enjoy more music and video contents than can be stored in its limited internal memory.

Display it the way you want with the P7 Cradle

You can enjoy various music and video files for longer hours even in outdoor places with the P7 Cradle that supports a speaker function. It can also recharge battery of the P7 at the same time playing it.
